Experience

Software Engineer - Learn With Stack (Ovloxx) Nov 2025 – Present

- Building **Ovloxx**, a project-tracking platform for non-technical founders to monitor execution and delivery.
- Developing a modular **NestJS + PostgreSQL** backend and **Next.js** app with clean API contracts for scalable feature delivery.
- Implementing integrations with **5 platforms (GitHub, Slack, Discord, Jira, and Linear)**, and designing a **RAG-based Q&A layer** over unified project context.

Software Engineer - Upesto (Savora Eats) Nov 2024 – Oct 2025

- Improved API performance by **40%** using **Redis caching** and async background processing for non-critical workloads.
- Built geo-search and location features using **NestJS + PostgreSQL + PostGIS**, and integrated Google Maps services.
- Designed scalable media uploads using **AWS S3 presigned URLs**, reducing backend load and improving reliability.

Backend Developer Intern - Vrixaa Labs Aug 2024 – Jan 2025

- Built a **GraphQL** backend for an LMS platform and implemented secure multi-device auth with refresh-token rotation.
- Shipped a Dockerized code-execution service (Monaco Editor integration) and an **FFmpeg-based** video pipeline.

Freelance Full Stack Developer - Evool Foundation (Voolata) Feb 2023 – May 2024

- Delivered a fundraising platform supporting one-time + subscription donations; integrated **Razorpay** with secure webhooks.
- Built QR-based campaign pages and tracking workflows to improve campaign sharing and donation flow.

Projects

Media Server (WebRTC + Mediasoup) github.com/UmanandaSiddha/Media-Server-WebRTC

- Built a multi-user video conferencing system using **WebRTC** with a **mediasoup SFU** and WebSocket signaling.
- Implemented room/session handling, reconnection flows, and RTP transport negotiation basics.

MediCode (OCR + GPT Medical Assistant) github.com/UmanandaSiddha/MediCode

- Built an OCR-to-LLM pipeline for extracting and summarizing medical text; **Special Mention**, NIT Silchar Hackathon (Jan 2024).

Achievements

- **Development Lead**, Google Developer Groups — Tezpur University (2024–25).
- **Special Mention**, NIT Silchar Hackathon (Jan 2024).

Technical Skills

TypeScript, JavaScript, Python, C++ , SQL • Node.js, NestJS, GraphQL, PostgreSQL, Redis, MongoDB, Prisma, BullMQ, WebSockets, PostGIS • React, Next.js, React Native, Tailwind • Docker, AWS (EC2/S3), GitHub Actions • WebRTC, mediasoup, FFmpeg • Auth (JWT/OAuth2), Microservices, Event-driven systems

Education

Tezpur University — B.Tech, Electronics & Communication Engineering (2022–2026) • GPA: 7.6/10
